General Comment

I, as a resident of the affected area for the proposed TMDL limits for the Chesapeake Bay watershed am somewhat concerned that too much emphasis is being placed on the farmers and not enough on the Urban areas. How about all the of the run off from the huge parking areas, not to mention the thousands of rooftops that pour polluted water into the bay. I understand that the airports use a type of antifreeze to de-ice the planes and runways, are they changing to another type that will not pollute the bay? There are a lot of other areas that need to be looked at before you start tightening the noose around the farmers neck. Remember don't complain about the farmers with your mouth full of food.
